Professional Summary

Aspiring Full Stack Software Engineer (2027 Batch) with hands-on experience building secure, scalable, production-grade web applications using JavaScript and React.js. Experienced in Git-based workflows and responsive frontend development. Seeking opportunities to contribute to real-world product development as a Software Development Apprentice.

Education

B.Tech — Information Technology

2023 – 2027

Meghnad Saha Institute of Technology, Kolkata

CGPA: 8.3/10

Relevant Coursework: DSA, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

Higher Secondary Education (Science)

2020 – 2022

Raghunath Bari R.T. High School

Percentage: 83.8%

Secondary Education

Kaminachak Sasibhusan Kanailal Vidyayatan

2019 – 2020

Percentage: 85%

Technical Skills

- **Languages:** Java, SQL, Python
- **Frontend:** React.js, JavaScript, HTML5, CSS, Tailwind CSS
- **Backend:** Node.js, Express.js, JWT
- **Databases:** MySQL, MongoDB
- **Tools:** Git, GitHub, Vercel, Railway, WebRTC

Experience

Frontend Developer Intern — CodeAlpha (Remote) | [Link](#)

- Developed a full-stack personal finance application using React.js, Node.js, and MongoDB with secure JWT authentication.
- Built real-time dashboards using Chart.js for improved financial insights.
- Implemented CSV data import and goal-based savings features, reducing manual effort by 40%.
- Designed responsive UI for cross-device accessibility.

Projects

MentorSpace — One-to-One Mentorship Platform | [Link](#)

- Built a low-latency communication platform using WebRTC and custom signaling.
- Developed collaborative code editor supporting 12+ programming languages.
- Designed secure REST APIs with authentication and role-based access.
- Deployed scalable backend services with CI/CD pipelines.

MSL-MSIT — Tournament Portal & Real-Time Bidding System | [Link](#)

- Engineered a real-time bidding system supporting multiple concurrent users.
- Optimized MongoDB queries for performance improvements.
- Deployed using Vercel and Railway for continuous integration and delivery.

Music Hub — Full-Stack Music Streaming Platform | [Link](#)

- Built a music streaming app with audio playback, playlists, artist pages & personalized library.
- Implemented JWT + Google OAuth authentication with role-based access control.
- Engineered a "Blend" feature that generates collaborative playlists using a weighted taste-match algorithm between two users.
- Integrated cloud storage for audio/images with parallel uploads and in-memory API caching for performance.
- Secured backend with rate limiting & CORS; deployed serverlessly with connection caching to handle cold-start latency.

Locallie — AI-Powered Civic Reporting Platform | [Link](#)

- Built a full-stack MERN app for reporting neighborhood issues with role-based dashboards for Residents, Community Heroes, NGOs, and Admins.
- Engineered an AI pipeline with NLP-based auto-categorization, severity scoring, duplicate detection & fake report filtering.
- Implemented a gamification engine with XP, badges & leaderboards to drive real-world civic participation.
- Integrated Leaflet maps with GPS picking, live issue markers, analytics dashboard, and custom MongoDB-based image storage; deployed on Vercel.

Certifications & Achievements

- HTML5, Python, Flask Framework — [Udemy](#)
- Data Analytics Essentials — [IBM Digital Credential](#)
- LEAD (Competitive Programming / DSA) — Hackerspace MSIT
- Winner — Smart India Hackathon (Internal) 2025

Hobbies

- Playing Cricket
- Playing Football
- Playing Badminton
