DEBAJYOTI SAMANTA

Kolkata, West Bengal, India • +91 9564555918 • debajyotisamanta2003@gmail.com • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Aspiring Full Stack Software Engineer (2027 Batch) with hands-on experience building secure, scalable, production-grade web applications. Experienced with Git-based version control workflows and responsive frontend development. Eager to contribute to real-world product development as a Software Development Apprentice.

EDUCATION

B.Tech — Information Technology | Meghnad Saha Institute of Technology, Kolkata 2023 –2027

CGPA: 8.3/10 | Coursework: DSA, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

Higher Secondary (Science) | Raghunath Bari R.T. High School 2020 – 2022

Percentage: 83.8%

Secondary Education | Kaminachak Sasibhusan Kanailal Vidyayatan 2019 – 2020

Percentage: 85%

TECHNICAL SKILLS

Languages: Java, SQL, C

Backend: Node.js, Express.js, Google OAuth 2.0, JWT

Frontend: React.js, JavaScript, HTML5, CSS, Tailwind CSS

Databases: MySQL, MongoDB, Relational Databases

Tools: Git, GitHub, Vercel, Render

EXPERIENCE

Frontend Developer Intern | *CodeAlpha (Remote)* **Link**

- Developed a responsive personal finance web app using React.js with a user-friendly UI.
- Built interactive financial dashboards using Chart.js for data visualization.
- Added CSV import and goal-based savings features to simplify financial tracking.
- Designed responsive interfaces for desktop, tablet, and mobile devices.

PROJECTS

MSL-MSIT — Tournament Portal & Real-Time Bidding System | Link

- Engineered a tournament platform managing player/manager registrations, payment verification, and automated bracket scheduling.
- Built a real-time auction and live match center with budget validations for bidding, in-game event logging (goals/cards), and stat aggregation.
- Optimized backend throughput via Mongoose serverless connection pooling, database indexing, and in-memory stats caching.
- Streamlined media delivery via Sharp and Cloudinary, compressing user uploads to cut roster API payload sizes by ~50%.

Music Hub — Full-Stack Music Streaming Platform | Link

- Integrated **Socket.IO** to enable real-time collaborative playlists and instant user notifications.
- Built a persistent audio player featuring multi-band equalizers and sound mixing with the **Web Audio API**.
- Configured **Multer** and **Cloudinary** for audio file uploads, image storage, and streaming delivery.
- Implemented **PWA caching** and offline storage for uninterrupted track playback without internet.
- Secured application using **Google OAuth** and **JWT** with role-based access control for an admin panel.

CERTIFICATIONS & ACHIEVEMENTS

- Attended the Indian Navy Pilot Entry SSB Interview at 12 SSB, Bengaluru — November 2026.
- Data Analytics Essentials — IBM Digital Credential
- LEAD(CompetitiveProgramming/DSA)— Hackerspace, Coding Community of MSIT.
- Winner of Smart India Hackathon (Internal) 2025.
